3

Go through the steps below for any identified blockages/challenges. The information provided will be used to gather data on service level and system blockages, in order to evidence the need for change.

**Aspiration**

What would the client like to achieve if the system could be changed, or the issue unblocked?

Could it benefit other clients and/or improve how services work together?

**Block**

What is getting in the way of this happening at the moment – what are the problems – either in the system or at a service level?

**Reflection**

What are people's thoughts about this issue?

## Questions

What do we need to know or do in order to start tackling this issue? Is there anything we need to clarify? Are there differences of opinion between services? Are there different remits of services? What does the client think about these issues?

## Actions

What are we able to do about the issue/system blockage today, within this case conference?  
What do we need to do after this meeting?: How, when, where & who with?
